

In the Description

Page 4, lines 25 to 27, change "The valve...piece 19." to

-- The valve body 21 is provided with an annular collar 22 for seating on an O-ring 23, that in turn, slides in the lower housing piece 19 as the valve body 21 moves up and down in the housing piece 19. As shown in Fig. 3A, the O-ring 23 is received in an annular recess in the valve body 21 and is compressed by the collar 22 against the housing piece 19 when in the extended position. As shown in Fig. 3B, when the valve body 21 is in the retracted position, the O-ring 23 is spaced from the housing 19 to permit a flow of water from the passage 18 about the valve body 21 and O-ring 23 into the passage 20. --
